

## 60 MIN WARM UP + ABS & ARMS & GLUTES CIRCUITS + LOWER BODY HITT with sliders

**Class title:** HITT Pilates **Duration:** 60 min; **Equipment:** mat, sliders

**Class Purpose and Objectives:** Focus on mind and body connection, stretch total body, and work the upper body, core, and lower legs with some HITT movements.

### WARM-UP (5 minutes)

| Duration   | Moves                                                       | Movement                                                                                                                                                                                                                                                                                                            | Purpose                                                          |
|------------|-------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| 1 min      | Child's pose                                                | Push hips back and stretch fingers towards the top of the mat                                                                                                                                                                                                                                                       | Warm up the spine, stretch the hamstrings, thighs and abdominals |
| 30 seconds | Table top→ cat and cows                                     | Come to all 4s position starting with a neutral spine, inhale as you initiate movement through the chest, lifting it towards the ceiling, along with you gaze if it feels comfortable on the neck. exhale as you round your back and lift the gaze towards the ceiling, not dumping lower back                      | Stretch arms, back, and abdominals                               |
| 30 sec     | Table top->downwards facing dog alternating                 | Still in all 4s, pelvis parallel to the ground, lift right hand up, opening up the right side of the body, then move right shoulder below left shoulder as you thread the right arm under your belly, stay in this pose for a few seconds. Exhale to bring hand back up and then come back to neutral. Switch sides | Side body stretch                                                |
| 1 min      | Table top -> alternating bird dog<br>- -> add wrist circles | From tabletop position extend right arm forward and left leg back,. Hold briefly, then return to center and switch sides in a slow, controlled manner.. Add wrist circles as extended keeping hips square to the mat and core engaged                                                                               | Strengthen core, glutes, and shoulders                           |

end-> introduce equipment, state its just an option

**Circuit #1: abs (10 min) Joseph Plates (10 sec rest between)**

| Duration | Moves                                         | Movement                                                                                                                                                                                                                                                                                                       | Purpose                                                                               |
|----------|-----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| 40 sec   | Crunch w legs lifted                          | Knees bent, feet grounded on the mat. Exhale as you lift the head and shoulders, drawing the navel toward the spine and curling the ribcage toward the pelvis. Inhale as you slowly lower back to the mat with control.<br>-> R: option to keep legs on mat                                                    | lower abs activation, hip flexor control, dynamic core stabilization                  |
| 40 sec   | The one leg stretch<br>-Alternating sides     | Lift head and shoulders into an abdominal curl with legs in tabletop. Exhale as one leg extends long and the opposite knee draws toward the chest. Inhale as you switch legs in a controlled alternating motion while maintaining abdominal engagement.<br>-> R: option to keep head on mat<br>-> P: go faster |    |
| 40 sec   | Bicycle legs                                  | From an abdominal curl, alternate the legs in a cycling motion. Exhale as one leg extends long, inhale as you transition and switch legs. Maintain a steady torso and controlled breathing rhythm.<br>-> P: perform slower                                                                                     | Lower abdominal endurance, hip mobility, coordination, sustained core stabilization   |
| 40 sec   | Leg Lowers                                    | Exhale to lower legs toward floor → inhale lift back to tabletop<br>->R: head rests on mat<br>->P: add a crunch at top                                                                                                                                                                                         | Lower abdominals                                                                      |
| 40 sec   | One Leg circle<br>->switch sides after 20 sec | One leg extended on the mat while the other reaches vertically. Inhale to begin the circle across the body and down, exhale as the leg completes the circle back to center. Maintain a stable pelvis and engaged core.<br>-> R: Bend the working leg slightly.<br>-> P: Perform larger circles                 |  |
| 40 sec   | Roll ups                                      | On the mat, inhale to prepare as you stretch the arms above the ears and legs straight out. Exhale to bring                                                                                                                                                                                                    | Spinal articulation, deep abdominal control, posterior chain mobility, coordination   |

|  |  |                                                                                                                                                            |  |
|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
|  |  | shoulders up, lift the chest and slowly roll up to sit, reach finger tips forward, and slowly roll back down<br>->R: Bend knees with feet anchored on mat. |  |
|--|--|------------------------------------------------------------------------------------------------------------------------------------------------------------|--|

## **\*\*FOLD MAT**

### **Circuit #2: upper body and core (4 min, 15 sec recovery)**

| Duration   | Moves                    | Movement                                                                                                                                                                                                                                                                                                                                    | Purpose                                                                             |
|------------|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| 1 min rest | Sit on mat               | Describe the next movements:<br>Go through all movements                                                                                                                                                                                                                                                                                    |                                                                                     |
| 30 sec     | Reverse plank to L-sit   | Begin in reverse plank with hands and heels grounded, chest lifted, and sliders under heels of feet. Inhale to hold the reverse plank. Exhale as you bend at the hips and slide the legs toward an L-sit position, lifting through the core. Inhale as you return to reverse plank.<br><br>-> R: Hold static reverse plank without sliding. |  |
| 30 sec     | In and outs with sliders | Sit up straight on mat, arms slightly bent behind the back, sliders are still under heels, inhale to slide the legs out straight, leaning your torso back to counterbalance.                                                                                                                                                                | Total core                                                                          |
| 30 sec     | Glute bridge             | -> slowly lower down to mat, heels on sliders planed on mat, exhale to lift the hips up and squeeze at the top, inhale to slowly lower back down                                                                                                                                                                                            | Hamstrings, glutes and hip mobility                                                 |
| 30 sec     | Glute bridge curl        | Lie on back with heels on sliders. Lift hips into bridge. Exhale as you slide heels toward glutes while keeping hips lifted. Inhale as you slowly extend the legs back out.                                                                                                                                                                 | Hamstrings, glutes and hip mobility                                                 |
| 30 sec     | Glute bridge pulse       | Pulse at the top with hips lifted and heels grounded to mt                                                                                                                                                                                                                                                                                  | Hamstrings, glutes and hip mobility                                                 |

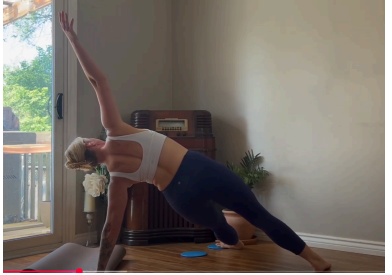

### Circuit #3- HITT- legs focused X 2 ) 10 sec rest

R-> dont use the sliders

| Duration                                                                  | Moves                                                   | Movement                                                                                                                                                                                                                                                                                                             | Purpose                                                                                        |
|---------------------------------------------------------------------------|---------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| 1 min rest                                                                | Come to standing                                        | Describe the next movements:<br>Start with left leg in front, slider under right leg behind                                                                                                                                                                                                                          |                                                                                                |
| 30 sec                                                                    | Single-leg lunge with slider                            | Stand with one foot planted and the other on a slider behind you. Inhale as the sliding leg moves back into a reverse lunge while the front knee bends. Exhale as you press through the front heel and slide the back foot forward to return to standing. Maintain upright posture and engaged core.                 | Glute and quadriceps strengthening, balance, hip stability, controlled eccentric leg work      |
| 30 sec                                                                    | Isometric hold Single-leg lunge with slider with pulse. | Lower into a lunge with the back foot on the slider. Hold the position while maintaining a strong core and upright torso. Exhale as you perform small pulsing movements up and down through the front leg. Inhale maintaining stability between pulses. R-> static lunge hold without pulses. P-> add overhead reach | Muscular endurance in glutes and quads, knee stability, isometric strength, lower-body control |
| Turn your right leg so that your body is now facing the volleyball courts |                                                         |                                                                                                                                                                                                                                                                                                                      |                                                                                                |
| 30 sec                                                                    | -><br>side lunge sliding out                            | Stand with one foot planted and the other on a slider to the side. Inhale as the sliding leg moves outward while the standing knee bends into a side lunge. Exhale as you engage the inner thigh and glute to pull the slider back to center standing tall.                                                          | Inner thigh activation, glute strengthening, hip mobility, lateral stability                   |
| 30 sec per                                                                | Isometric hold squat with side lunge                    | Starting in a squat, inhale as the sliding leg moves outward while the standing knee bends into a side lunge. Exhale as you engage the inner thigh and glute to pull the slider back to center staying low                                                                                                           | Inner thigh activation, glute strengthening, hip mobility, lateral stability                   |

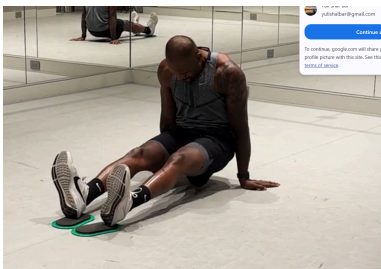

**Circuit #4 - Upper body and core (If there is time) R-> dont use the sliders**

**Pyramid, after mountain climbers go back exercises on other side ↓↑**

| Duration | Moves                               | Movement                                                                                                                                                                                                                                                                | Purpose                                                                                                          |
|----------|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| 40 sec   | Straight leg sweep                  | Slider under toes on working leg, in a high plank, stay squared to the mat as you slide the straight leg outwards, perpendicular to the body, exhale to come back to center<br>R-> do this on knees                                                                     | Glutes, core, and upper body                                                                                     |
| 40 sec   | Straight leg sweep circles<br>->    | Slider under toes on working leg, in a high plank, stay squared to the mat, exhale as you slide the straight leg inwards towards the chest, inhale to circle the leg outwards and slide back to center creating a circular motion<br>R-> do this on knees               | Glutes, core, and upper body                                                                                     |
| 40 sec   | Threat the leg and open to the side | In a high plank, slide working leg, pelvis parallel to the ground, lift right hand up, opening up the right side of the body, then slide working leg straight under the body towards the right side. Exhale to bring hand back up and then come back to neutra l.Repeat |                              |
| 40 sec   | Sliders mountain climbers           | Begin in a high plank with both feet on sliders, hands under shoulders Exhale as you slide one knee toward the chest while keeping hips low and spine neutral. Inhale as you slide the leg back and alternate sides                                                     | Cardiovascular activation, core stability, hip flexor strength, shoulder endurance, dynamic full-body engagement |

**Circuit #5: upper body and core (4 min, 15 sec recovery)**

| Duration   | Moves      | Movement                                                 | Purpose |
|------------|------------|----------------------------------------------------------|---------|
| 1 min rest | Sit on mat | Describe the next movements:<br>Go through all movements |         |

|        |                          |                                                                                                                                                                                                                                                                                                                                                       |                                                                                     |
|--------|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| 30 sec | Reverse plank to L-sit   | <p>Begin in reverse plank with hands and heels grounded, chest lifted, and sliders under heels of feet. Inhale to hold the reverse plank. Exhale as you bend at the hips and slide the legs toward an L-sit position, lifting through the core. Inhale as you return to reverse plank.</p> <p>-&gt; R: Hold static reverse plank without sliding.</p> |  |
| 30 sec | In and outs with sliders | Sit up straight on mat, arms slightly bent behind the back, sliders are still under heels, inhale to slide the legs out straight, leaning your torso back to counterbalance.                                                                                                                                                                          | Total core                                                                          |
| 30 sec | Glute bridge             | -> slowly lower down to mat, heels on sliders planed on mat, exhale to lift the hips up and squeeze at the top, inhale to slowly lower back down                                                                                                                                                                                                      | Hamstrings, glutes and hip mobility                                                 |
| 30 sec | Glute bridge curl        | Lie on back with heels on sliders. Lift hips into bridge. Exhale as you slide heels toward glutes while keeping hips lifted. Inhale as you slowly extend the legs back out.                                                                                                                                                                           | Hamstrings, glutes and hip mobility                                                 |
| 30 sec | Glute bridge pulse       | Pulse at the top with hips lifted and heels grounded to mt                                                                                                                                                                                                                                                                                            | Hamstrings, glutes and hip mobility                                                 |

- Add one minute rest

**\*\*UNFLOD MAT**

**Circuit #6: side body (no slider) -> no rest in between**

| Duration | Moves                 | Movement                                                                                      | Purpose                                       |
|----------|-----------------------|-----------------------------------------------------------------------------------------------|-----------------------------------------------|
| 40 sec   | Leg lift              | Laying down with straight legs, point top foot and lift up, lower down as you flex and repeat | Isolated glute, hip mobility, side abdominals |
| 40 sec   | Big leg circles       | Still on the same side, lift top leg and draw large circles                                   | Isolated glute, hip mobility, side abdominals |
| 40 sec   | Forward and back kick | Flex foot, exhale and to kick leg forward (X2), inhale point foot, extend                     | Isolated glute, hip mobility, side abdominals |

|        |                                                     |                                                                                                                                                                                                                               |                                                                                     |
|--------|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|        |                                                     | it all the way back                                                                                                                                                                                                           |                                                                                     |
| 40 sec | Small leg circle pulses<br>-> 20 sec each direction | Draw small circles with lifted leg                                                                                                                                                                                            | Isolated glute, hip mobility,<br>side abdominals                                    |
| 40 sec | Straight leg crunches                               | Come up to forearm Lower top foot on mat with the knee bent , keep lower foot straight, exhale to lift it towards the chest and crunch towards it with opposite arm that is placed behind the ear. Inhale to lower and repeat |  |
|        | Trice mmp Side Push-Up                              | The hand behind your head comes down to mat, the forearm that was previously on mat comes across the belly, exhale to push away from the mat using the triceps, inhale to lower down to mat. Repeat                           |  |

**->20 seconds break**

**>Repeat on left side**

**End- take child's pose and come to knees**

### **Cooldown (10 min)**

| Duration              | Moves                                                                                    | Movement                                                                                                                                                                                                              | Purpose                                                                        |
|-----------------------|------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| 30 sec                | transition-> come to knees                                                               |                                                                                                                                                                                                                       |                                                                                |
| 2 min                 | Hamstring stretch<br>-> seated forward fold                                              | Sit with legs extended forward. Inhale reaching arms overhead to lengthen the spine. Exhale as you hinge forward from the hips, reaching toward the feet while relaxing the neck and shoulders.                       | Hamstring flexibility, posterior chain release, gentle spinal decompression    |
| 30 sec                | Lower down slowly                                                                        | From seated, exhale as you slowly roll down to the mat one vertebra at a time. Inhale once fully lying down.                                                                                                          | Spinal articulation, controlled transition to supine position, core engagement |
| 4 min<br>(2 per side) | Lying figure four<br>->lower ground, twist body towards opposite side<br>-> switch sides | Lie on back with knees bent. Cross one ankle over opposite knee. Inhale to prepare. Exhale as you gently pull the supporting leg toward the chest, stretching the hip and glutes.<br>-> use biceps for deeper stretch | Glute and piriformis stretch, hip mobility, lower back relief                  |

|        |                       |                                                                                                                                                                                    |                                                      |
|--------|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|
|        |                       | From figure four position, lower both legs toward the opposite side. Inhale to lengthen the spine. Exhale as you rotate into the twist while keeping shoulders relaxed on the mat. |                                                      |
| 30 sec | over head arm stretch | Extend arms overhead along the mat. Inhale reaching through fingers and toes to lengthen the body. Exhale relaxing shoulders and allowing the chest to open.                       | Full-body lengthening, shoulder mobility, relaxation |
| 3 min  | Shavasana             | Lie comfortably on back with arms relaxed at sides. Slow inhale through the nose, slow exhale through the mouth. Allow the body to fully relax and breathing to settle naturally.  | Relaxing the mind                                    |

**end-> come to seated**

**Closing words:** Thank you for coming today and working out early in the morning, amazing job!  
Dont forget to wipe down your mat and the sliders. Have a great spring break!!
